

Professional Touring Car Racing Made Affordable

Victor Racing DRS Rear Wing Approved for U.S. Touring Car Championship

AUSTIN, Texas, February 18, 2020 – Victor Racing, Inc. a leader in Smart Active Aero products and Drag Reduction System (DRS) announced today, in conjunction with the United States Touring Car Championship (USTCC), that its award winning Smart Active Aero products have been approved for use in the upcoming 2020 racing season.

The first of its kind, Victor Racing's Smart Active Aero Wings are standalone systems with built-in computers and various sensors that will automatically control the position of the rear wing using sophisticated software algorithms to optimize downforces needed to maximize the performance of the cars to produce the quickest lap times possible.

As the sole provider of Active Aero products for the USTCC, Victor Racing offers several different models, which can be utilized by a wide-variety of car models competing in the various classes for the series.

"It is very exciting to be the only professional series outside of Formula 1 to utilize DRS and Victor Racing products are high quality and affordable," commented Ali Arsham, Managing Director of USTCC.

While performance is key to the design of Victor Racing's Smart Active Aero products, styling and "cool-factors" were also taken into account. Even if someone never uses these products on a race track, the fact that they have Active Aero technologies on their car, puts them into a level that is normally only reserved for super and hyper cars costing hundred of thousands to millions of dollars.

"We set out to increase the use of Smart Active Aero technologies for the masses, which is a noble idea since before us, it was mostly exclusive to very expensive cars", said Victor Wong, CEO, Victor Racing. "We made our products simple to install and with a starting price of just \$1,499, financially accessible for most everyone."

About Victor Racing, Inc: Victor Racing is a member of SEMA and is dedicated to bringing leading edge technologies to the automotive industry at the lowest prices possible. We believe in performance and value for all. Complete Victor Racing Smart Active Aero information can be found at: <http://www.VictorRacing.com>

About USTCC: USTCC is a professional road racing series comprising of late model sport compact sedans such as BMW 3 series, Mazdaspeed 3, Hyundai Genesis Coupe, Honda Civic and others. The cars use slightly modified engines and highly modified suspensions with aerodynamic ground effects and sticky Hankook slick race tires. The races can be seen exclusively on Final Drive TV available on NBC Sports on Xfinity cable, Dish Network, DirecTV and AT&T U-verse. For more information on USTCC, visit <http://www.ustcc.com>
